

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarter ended: **March 31, 2022**

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File Number: **000-55406**

Nightfood Holdings, Inc.

(Exact name of registrant as specified in its charter)

Nevada

(State or Other Jurisdiction of
Incorporation or Organization)

46-3885019

(I.R.S. Employer
Identification No.)

**520 White Plains Road, Suite 500
Tarrytown, New York**

(Address of Principal Executive Offices)

10591

(Zip Code)

888-888-6444

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirement for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
N/A	N/A	N/A

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date. At May 13, 2022, the registrant had outstanding 91,749,831 shares of common stock.

Nightfood Holdings, Inc.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

- 1. Description of Business**
- Nightfood Holdings, Inc. (“we”, “us” “the Company” or “Nightfood”) is a Nevada corporation organized on October 16, 2013 to acquire all of the issued and outstanding shares of Nightfood, Inc., a New York corporation from its sole shareholder, Sean Folkson. All of our operations are conducted by our Subsidiaries (Nightfood, Inc. and MJ Munchies, Inc.)
- Our corporate address is 520 White Plains Road – Suite 500, Tarrytown, New York 10591 and our telephone number is 888-888-6444. We maintain a web site at www.nightfood.com, along with several additional web properties. Any information that may appear on our web site should not be deemed to be a part of this report.
- The Company’s fiscal year end is June 30.
- 2. Summary of Significant Accounting Policies**
- Management is responsible for the fair presentation of the Company’s financial statements, prepared in accordance with U.S. generally accepted accounting principles (GAAP).
- Interim Financial Statements**
- These unaudited condensed consolidated financial statements for the three and nine months ended March 31, 2022 and 2021, respectively, reflect all adjustments including normal recurring adjustments, which, in the opinion of management, are necessary to present fairly the financial position, results of operations and cash flows for the periods presented in accordance with the accounting principles generally accepted in the United States of America.
- These interim unaudited condensed consolidated financial statements should be read in conjunction with the Company’s consolidated financial statements and notes thereto for the fiscal years ended June 30, 2021 and 2020, respectively, which are included in the Company’s June 30, 2021 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission on October 13, 2021. The Company assumes that the users of the interim financial information herein have read, or have access to, the audited consolidated financial statements for the preceding period, and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. The results of operations for the three and nine months ended March 31, 2022, are not necessarily indicative of results for the entire fiscal year ending June 30, 2022.
- The Company made certain reclassifications to prior period amounts to conform with the current year’s presentation. These reclassifications did not have a material effect on the condensed consolidated statement of financial position, results of operations or cash flows.
- Use of Estimates**
- The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates are used in the determination of depreciation and amortization, the valuation for non-cash issuances of common stock, and the website, income taxes and contingencies, valuing convertible notes for BCF (as defined below) and derivative liability, among others.
- Cash and Cash Equivalents**
- The Company classifies as cash and cash equivalents amounts on deposit in the banks and cash temporarily in various instruments with original maturities of three months or less at the time of purchase. The Company places its cash and cash equivalents on deposit with financial institutions in the United States. The Federal Deposit Insurance Corporation (“FDIC”) covers \$250,000 for substantially all depository accounts. The Company from time to time may have amounts on deposit in excess of the insured limits.

Fair Value of Financial Instruments	Statement of financial accounting standard FASB Topic 820, Disclosures about Fair Value of Financial Instruments, requires that the Company disclose estimated fair values of financial instruments. The carrying amounts reported in the statements of financial position for assets and liabilities qualifying as financial instruments are a reasonable estimate of fair value.
Inventories	Inventories consisting of packaged food items and supplies are stated at the lower of cost (FIFO) or net realizable value, including provisions for spoilage commensurate with known or estimated exposures which are recorded as a charge to cost of sales during the period spoilage is incurred. The Company has no minimum purchase commitments with its vendors.
Advertising Costs	Advertising costs are expensed when incurred and are included in advertising and promotional expense in the accompanying statements of operations. Although not traditionally thought of by many as “advertising costs”, the Company includes expenses related to graphic design work, package design, website design, domain names, and product samples in the category of “advertising costs”. The Company recorded advertising costs of \$ 549,516 and \$316,483 for the nine months ended March 31, 2022 and 2021, respectively. The Company recorded advertising costs of \$56,959 and \$64,158 for the three months ended March 31, 2022 and 2021, respectively.
Income Taxes	<p>The Company has not generated any taxable income, and, therefore, no provision for income taxes has been provided.</p> <p>Deferred income taxes are reported for timing differences between items of income or expense reported in the financial statements and those reported for income tax purposes in accordance with FASB Topic 740, “Accounting for Income Taxes”, which requires the use of the asset/liability method of accounting for income taxes. Deferred income taxes and tax benefits are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and for tax loss and credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The Company provides for deferred taxes for the estimated future tax effects attributable to temporary differences and carry-forwards when realization is more likely than not.</p> <p>A valuation allowance has been recorded to fully offset the deferred tax asset even though the Company believes it is more likely than not that the assets will be utilized.</p> <p>The Company’s effective tax rate differs from the statutory rates associated with taxing jurisdictions because of permanent and temporary timing differences as well as a valuation allowance.</p>
Revenue Recognition	<p>The Company generates its revenue by selling its products wholesale to retailers and wholesalers.</p> <p>All sources of revenue are recorded pursuant to FASB Topic 606 Revenue Recognition, to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This includes a five-step framework that requires an entity to: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract, and (v) recognize revenue when the entity satisfies a performance obligation. In addition, this revenue generation requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers.</p>

The Company frequently offers sales discounts and promotions to supermarket customers through various programs such as rebates, temporary price reductions, product coupons, and other trade activities. This is standard practice for consumer products in the competitive and price-sensitive supermarket space. The Company records these activities as a reduction of gross sales as part of the calculation to arrive at reported net revenue.

The Company incurs costs associated with product distribution, such as freight and handling costs. The Company has elected to treat these costs as fulfillment activities and recognizes these costs at the same time that it recognizes the underlying product revenue. As this policy election is in line with the Company's previous accounting practices, the treatment of shipping and handling activities under FASB Topic 606 did not have any impact on the Company's results of operations, financial condition and/or financial statement disclosures.

The adoption of ASC 606 did not result in a change to the accounting for any of the Company's revenue streams that are within the scope of the amendments. The Company's services that fall within the scope of ASC 606 are recognized as revenue as the Company satisfies its obligation to the customer.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which updates revenue recognition guidance relating to contracts with customers. This standard states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This standard is effective for annual reporting periods, and interim periods therein, beginning after July 1, 2018. The Company adopted ASU 2014-09 and its related amendments (collectively known as "ASC 606") during the first quarter of fiscal 2019 using the full retrospective method.

Management reviewed ASC 606-10-32-25 which states "*Consideration payable to a customer includes cash amounts that an entity pays, or expects to pay, to the customer (or to other parties that purchase the entity's goods or services from the customer). Consideration payable to a customer also includes credit or other items (for example, a coupon or voucher) that can be applied against amounts owed to the entity (or to other parties that purchase the entity's goods or services from the customer). An entity shall account for consideration payable to a customer as a reduction of the transaction price and, therefore, of revenue unless the payment to the customer is in exchange for a distinct good or service (as described in paragraphs 606-10-25-18 through 25-22) that the customer transfers to the entity. If the consideration payable to a customer includes a variable amount, an entity shall estimate the transaction price (including assessing whether the estimate of variable consideration is constrained) in accordance with paragraphs 606-10-32-5 through 32-13.*"

If the consideration payable to a customer is a payment for a distinct good service, then in accordance with ASC 606-10-32-26, the entity should account for it the same way that it accounts for other purchases from suppliers (expense). Further, "*if the amount of consideration payable to the customer exceeds the fair value of the distinct good or service that the entity receives from the customer, then the entity shall account for such an excess as a reduction of the transaction price. If the entity cannot reasonably estimate the fair value of the good or service received from the customer, it shall account for all of the consideration payable to the customer as a reduction of the transaction price.*"

- a) *The entity recognizes revenue for the transfer of the related goods or services to the customer.*
- b) *The entity pays or promises to pay the consideration (even if the payment is conditional on a future event). That promise might be implied by the entity's customary business practices."*

Management reviewed each arrangement to determine if each fee paid is for a distinct good or service and should be expensed as incurred or if the Company should recognize the payment as a reduction of revenue.

The Company recognizes revenue upon shipment based on meeting the transfer of control criteria. The Company has made a policy election to treat shipping and handling as costs to fulfill the contract, and as a result, any fees received from customers are included in the transaction price allocated to the performance obligation of providing goods with a corresponding amount accrued within cost of sales for amounts paid to applicable carriers.

Concentration of Credit Risk	Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash deposits at financial institutions. At various times during the year, the Company may exceed the federally insured limits. To mitigate this risk, the Company places its cash deposits only with high credit quality institutions. Management believes the risk of loss is minimal. At March 31, 2022 and June 30, 2021, the Company did not have any uninsured cash deposits.
Beneficial Conversion Feature	<p>For conventional convertible debt where the rate of conversion is below market value, the Company records any “beneficial conversion feature” (“BCF”) intrinsic value as additional paid in capital and related debt discount.</p> <p>When the Company records a BCF, the relative fair value of the BCF is recorded as a debt discount against the face amount of the respective debt instrument. The discount is amortized over the life of the debt. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.</p>
Debt Issue Costs	The Company may pay debt issue costs in connection with raising funds through the issuance of debt whether convertible or not or with other consideration. These costs are recorded as debt discounts and are amortized over the life of the debt to the statement of operations as amortization of debt discount. The debt issuance costs paid to the third party consultant was directly expensed as incurred.
Original Issue Discount	If debt is issued with an original issue discount, the original issue discount is recorded to debt discount, reducing the face amount of the note and is amortized over the life of the debt to the statement of operations as amortization of debt discount. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.
Valuation of Derivative Instruments	ASC 815 “Derivatives and Hedging” requires that embedded derivative instruments be bifurcated and assessed, along with free-standing derivative instruments such as warrants, on their issuance date and measured at their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Trinomial Tree option pricing formula. Upon conversion of a note where the embedded conversion option has been bifurcated and accounted for as a derivative liability, the Company records the shares at fair value, relieves all related notes, derivatives and debt discounts and recognizes a net gain or loss on derivative liability under the line item “change in derivative liability”.
Derivative Financial Instruments	The Company does not use derivative instruments to hedge exposures to cash flow, market or foreign currency risks. The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and then is revalued at each reporting date, with changes in fair value reported in the consolidated statement of operations. For stock based derivative financial instruments, Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Trinomial Tree option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once determined, derivative liabilities are adjusted to reflect fair value at the end of each reporting period. Any increase or decrease in the fair value from inception is made quarterly and appears in results of operations as a change in fair market value of derivative liabilities.

The Company has adopted ASU 2017-11, Earnings per share (Topic 260), provided that when determining whether certain financial instruments should be classified as liability or equity instruments, a down round feature no longer precludes equity classification when assessing whether the instrument is indexed to an entity's own stock. If a down round feature on the conversion option embedded in the note is triggered, the Company will evaluate whether a beneficial conversion feature exists, the Company will record the amount as a debt discount and will amortize it over the remaining term of the debt.

If the down round feature in the warrants that are classified as equity is triggered, the Company will recognize the effect of the down round as a deemed dividend. While the Company currently has no plans to attempt to pay dividends for the foreseeable future to any stockholders, such a deemed dividend would reduce the income available to common stockholders in the hypothetical scenario where a dividend were to be contemplated.

Stock-Based Compensation

The Company accounts for share-based awards issued to employees in accordance with FASB ASC 718. Accordingly, employee share-based payment compensation is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite service period. Additionally, share-based awards to non-employees are expensed over the period in which the related services are rendered at their fair value. The Company applies ASC 718, "Equity Based Payments to Non-Employees", with respect to options and warrants issued to non-employees.

Customer Concentration

During the nine months ended March 31, 2022, the Company had one customer account for approximately 30% of the gross sales. One other customer accounted for approximately 23% of gross sales, and two other customers accounted for between 10 and 15% of gross sales. During the nine months ended March 31, 2021, the Company had one customer account for approximately 37% of the gross sales. One other customer accounted for approximately 23% of gross sales, and one other customer accounted for over 11% of gross sales.

During the three months ended March 31, 2022, the Company had one customer account for approximately 44% of the gross sales and another customer account for approximately 36% of the gross sales. During the three months ended March 31, 2021, the Company had one customer account for approximately 44% of the gross sales.

Vendor Concentration

During the three-month period ended March 31, 2022, no vendors accounted for more than 9% of our operating expenses. During the nine-month period ended March 31, 2022, no vendor accounted for more than 9% of our operating expenses.

During the three-month period ended March 31, 2021, no vendors accounted for more than 14% of our operating expenses. During the nine-month period ended March 31, 2021 no vendor accounted for more than 8%.

Receivables Concentration

As of March 31, 2022, the Company had receivables due from six customers. One of which accounted for 60% of the total balance, one of which accounted for 19% of the total balance and one of which accounted for 14% of the total balance. As of June 30, 2021, the Company had receivables due from four customers, two of whom accounted for over 70% of the outstanding balance. Two of the four accounted for approximately 30% of the total balance.

Income/Loss Per Share

Net income/loss per share data for both the three and nine-month periods ending March 31, 2022 and 2021, are based on net income/loss available to common shareholders divided by the weighted average of the number of common shares outstanding. The Company does not present a diluted Earnings per share as the convertible debt and interest that is convertible into shares of the Company's common stock would not be included in this computation, as the Company is generating a loss and therefore these shares would be antidilutive.

Impairment of Long-lived Assets

The Company accounts for long-lived assets in accordance with the provisions of FASB Topic 360, Accounting for the Impairment of Long-Lived Assets. This statement requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. Fair values are determined based on quoted market value, discounted cash flows or internal and external appraisals, as applicable.

During the three- and nine-months periods ended March 31, 2022 and 2021, there were no impairments on intangible assets.

Reclassification

The Company may make certain reclassifications to prior period amounts to conform with the current year's presentation. These reclassifications did not have a material effect on its consolidated statement of financial position, results of operations or cash flows.

Recent Accounting Pronouncements

In August 2020, the FASB issued ASU 2020-06 to simplify the current guidance for convertible instruments and the derivatives scope exception for contracts in an entity's own equity. Additionally, the amendments affect the diluted EPS calculation for instruments that may be settled in cash or shares and for convertible instruments. The update also provides for expanded disclosure requirements to increase transparency. For SEC filers, excluding smaller reporting companies, this update is effective for fiscal years beginning after December 15, 2021 including interim periods within those fiscal years. For all other entities, this update is effective for fiscal years beginning after December 15, 2023, including interim periods therein. The Company believes the adoption of this guidance will not materially impact its financial statements and related disclosures.

The Company will continue to monitor these and other emerging issues to assess any potential future impact on its financial statements.

3. Going Concern

The Company's financial statements are prepared using generally accepted accounting principles, which contemplate the realization of assets and liquidation of liabilities in the normal course of business. Because the business remains unproven and may not ever attain profitability, no certainty of continuation can be stated.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. For the nine months ended March 31, 2022, the Company had a net loss of \$2,048,362 (comprised of operating loss of \$1,645,538 and other expenses of \$402,824, most of which is comprised of interest and amortization related to the Company's convertible note financing and changes in the share price of the common stock), negative cash flow from operations of \$1,728,876 and accumulated deficit of \$27,603,890.

While most of the Company's internal financial model scenarios project it reaching profitability early in Fiscal 2023, cash on hand does not project to be adequate to satisfy its mid-range working capital needs to get the Company both to profitability and also cash flow positive. As a result, the Company anticipates raising capital early in Fiscal 2023.

The Company believes that forthcoming business developments along with its current capitalization structure will enable it to successfully secure required financing to continue its planned growth in the hotel vertical.

Because the business has limited operating history and sales, no certainty of continuation can be stated. Management has devoted a significant amount of time in the raising of capital from additional debt and equity financing. However, the Company's ability to continue as a going concern will again be dependent upon raising additional funds through debt and equity financing and generating revenue. There are no assurances the Company will receive the necessary funding or generate revenue necessary to fund operations long-term.

The Company cannot give any assurance that it will, in the future, be able to achieve a level of profitability from the sale of its products to sustain its operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern for one year from the date the financials are issued. The accompanying financial statements do not include any adjustments to reflect the possible future effects on recoverability and reclassification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

There is still potential uncertainty resulting from the outbreak of the novel coronavirus (COVID-19) (the “Pandemic”), including those potentially related to measures to reduce its spread, and the impact on the economy. Rates of unemployment, recession, inflation, and other possible unforeseen factors could also have an impact.

From both public statements, and conversations between Nightfood management and current and former executives from certain global food and beverage conglomerates, management believes that there is increased strategic interest in the nighttime nutrition space as a potential high-growth opportunity, partially due to ongoing declines in consumer sleep quality and increases in at-home nighttime snacking, both trends believed to be accelerated by COVID.

The Company has experienced no material issues with supply chain or logistics resulting from COVID. Order processing function has been consistent with historical norms. As stated in Development Plans below, the Company is in the process of transitioning contract manufacturers to handle increased demand and does not anticipate any disruption from this transition as a result of COVID or any other causes.

It is possible that the fallout from the Pandemic could make it more difficult in the future for the Company to access required growth capital, possibly rendering the Company unable to meet certain debts and expenses.

More directly, the Pandemic has impaired the Company’s ability to execute certain in-store and out-of-store marketing initiatives within the normal course of supermarket business. For example, since the inception of the Pandemic, the Company was unable to conduct in-store demonstrations and unable to participate in local pregnancy, baby expos, and health expos that were originally intended to be part of our marketing mix for supermarket distribution. Furthermore, the Company’s national hotel rollout, which is currently underway, had previously experienced Pandemic-related delays.

Additionally, with more consumers shopping online, both for delivery or at-store pickup, the opportunity for supermarket shoppers to learn about new brands at the point of purchase has been somewhat diminished. Management is working to identify opportunities to build awareness and drive supermarket trial and growth under these new circumstances, while simultaneously executing a strategic pivot to focus on hotel distribution for immediate growth.

It is impossible to know what the future holds with regard to the Pandemic, both for the Company and in the broader sense. There are many uncertainties regarding the Pandemic, and the Company is closely monitoring the impact of the Pandemic on all aspects of its business, including how it will impact its customers, vendors, and business partners.

It is difficult to know if the Pandemic has materially impacted the results of operations of the Company, and it is unable to predict the impact that the Pandemic will have on its financial position and operating results due to numerous uncertainties. The Company expects to continue to assess the evolving impact of the Pandemic and intends to make adjustments accordingly, if necessary.

4. Accounts receivable

The Company’s accounts receivable arise primarily from the sale of the Company’s snack products. On a periodic basis, the Company evaluates each customer account and based on the days outstanding of the receivable, history of past write-offs, collections, and current credit conditions, writes off accounts it considers uncollectible. With most of our retail and distribution partners, invoices will typically be due in 30 days. The Company does not accrue interest on past due accounts and the Company does not require collateral. Accounts become past due on an account-by-account basis. Determination that an account is uncollectible is made after all reasonable collection efforts have been exhausted. The Company has not provided any accounts receivable allowances for March 31, 2022 and June 30, 2021, respectively.

5. Inventories

Inventory consists of the following at March 31, 2022 and June 30, 2021,

	March 31, 2022	June 30, 2021
Finished goods – ice cream	\$ 172,736	\$ 338,369
Raw material – ingredients	47,021	14,760
Packaging	72,032	59,010
Allowance for unsaleable	-	(24,403)
TOTAL	\$ 291,789	\$ 387,736

Inventories are stated at the lower of cost or net realizable value. The Company periodically reviews the value of items in inventory and provides write-downs or write-offs of inventory based on its assessment of market conditions and the products relative shelf life. Write-downs and write-offs are charged to loss on inventory write down.

6. Other current assets

Other current assets consist of the following vendor deposits at December 31, 2021 and June 30, 2021. The majority of this amount relates to deposits to third party vendors for inventory and services.

	March 31, 2022	June 30, 2021
Vendor deposits – Other	\$ 155,771	\$ 33,480
TOTAL	\$ 155,771	\$ 33,480

7. Other Current Liabilities

- Other current liabilities consist of the following at March 31, 2022 and June 30, 2021,

	March 31, 2022	June 30, 2021
Accrued consulting fees – related party	\$ 3,000	3,000
TOTAL	\$ 3,000	3,000

8. Convertible Notes Payable

- Convertible Notes Payable consist of the following at March 31, 2022,

On April 30, 2018, the Company entered into a convertible promissory note and a security purchase agreement dated April 30, 2018, in the amount of \$225,000. The lender was Eagle Equities, LLC. The notes have a maturity of April 30, 2019, and interest rate of 8% per annum and are convertible at a price of 60% of the lowest closing bid price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging."

The fair value of the \$225,000 Notes was calculated using the Black-Scholes pricing model at \$287,174, with the following assumptions: risk-free interest rate of 2.24%, expected life of 1 year, volatility of 202%, and expected dividend yield of zero. Because the fair value of the note exceeded the net proceeds from the \$225k Notes, a charge was recorded to "Financing cost" for the excess of the fair value of the note, for a net charge of \$62,174. This note has been successfully retired via conversions into shares as of June 30, 2021.

On February 14, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated February 14, 2019, in the amount of \$104,000. The lender was Eagle Equities, LLC. The notes have a maturity of February 14, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$104,000 Notes was calculated using the Black-Scholes pricing model at \$90,567, with the following assumptions: risk-free interest rate of 2.53%, expected life of 1 year, volatility of 136%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$104k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of September 30, 2020, and June 30, 2020, the debt discount was \$0 and \$0, respectively. \$50,000 of the note has been successfully retired via conversion into shares during the year ended June 30, 2020 and \$54,000 of the note has been successfully retired via conversion into shares during the three months ended September 30, 2020. The Company fair valued the notes as of conversion date and accounted for a loss on conversion of \$4,098 included under line item "Loss on debt extinguishment upon note conversion, net" during 2020 fiscal year and accounted for a loss on conversion of \$36,242.

On April 29, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated April 29, 2019, in the amount of \$208,000. The lender was Eagle Equities, LLC. The notes have a maturity of April 29, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$208,000 Notes was calculated using the Black-Scholes pricing model at \$170,098, with the following assumptions: risk-free interest rate of 2.42%, expected life of 1 year, volatility of 118%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$208k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of September 30, 2020, and June 30, 2020, the debt discount was \$0 and \$0, respectively. \$208,000 of the note has been successfully retired via conversion into shares during the three months ended September 30, 2020. The Company fair valued the notes as of conversion date and accounted for a loss on conversion of \$109,561 included under line item "Loss on debt extinguishment upon note conversion, net".

On June 11, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated June 11, 2019, in the amount of \$300,000. The lender was Eagle Equities, LLC. The notes have a maturity of June 11, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$300,000 Notes was calculated using the Black-Scholes pricing model at \$240,217, with the following assumptions: risk-free interest rate of 2.05%, expected life of 1 year, volatility of 16%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$300,000 Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of September 30, 2020 and June 30, 2020, the debt discount was \$0 and \$46,726, respectively. The Company fair valued the notes as of conversion date and accounted for a loss on conversion of \$42,595 included under line item "Loss on debt extinguishment upon note conversion, net".

On July 5, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated July 5, 2019, in the amount of \$300,000. The lender was Eagle Equities, LLC. The notes have a maturity of July 5, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$300,000 Notes was calculated using the Black-Scholes pricing model at \$239,759, with the following assumptions: risk-free interest rate of 1.98%, expected life of 1 year, volatility of 118%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the 300k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021 and June 30, 2020, the debt discount was \$0 and \$2,627, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On August 8, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated August 8, 2019, in the amount of \$300,000. The lender was Eagle Equities, LLC. The notes have a maturity of August 8, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$300,000 Notes was calculated using the Black-Scholes pricing model at \$254,082, with the following assumptions: risk-free interest rate of 1.79%, expected life of 1 year, volatility of 113%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$300k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021, and June 30, 2020 the debt discount was \$0 and \$26,452, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On August 29, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated August 29, 2019, in the amount of \$300,000. The lender was Eagle Equities, LLC. The notes have a maturity of August 29, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$300,000 Notes was calculated using the Black-Scholes pricing model at \$234,052, with the following assumptions: risk-free interest rate of 1.75%, expected life of 1 year, volatility of 113%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$300,000 Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021, and June 30, 2020 the debt discount was \$0 and \$37,833, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On September 24, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated September 24, 2019, in the amount of \$150,000. The lender was Eagle Equities, LLC. The notes have a maturity of September 24, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$150,000 Notes was calculated using the Black-Scholes pricing model at \$118,009, with the following assumptions: risk-free interest rate of 1.78%, expected life of 1 year, volatility of 113%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$150k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021 and June 30, 2020, the debt discount was \$0 and \$27,482, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On November 7, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated November 7, 2019, in the amount of \$150,000. The lender was Eagle Equities, LLC. The notes have a maturity of November 7, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$150,000 Notes was calculated using the Black-Scholes pricing model at \$121,875, with the following assumptions: risk-free interest rate of 1.58%, expected life of 1 year, volatility of 122%, and expected dividend yield of zero. Because the fair value of the note did not exceed the net proceeds from the \$150k Notes, no charge was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021 and June 30, 2020, the debt discount was \$0 and \$43,074, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On December 31, 2019, the Company entered into a convertible promissory note and a security purchase agreement dated December 31, 2019, in the amount of \$150,000. The lender was Eagle Equities, LLC. The notes have a maturity of December 31, 2020 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$150,000 Notes was calculated using the Black-Scholes pricing model at \$189,172, with the following assumptions: risk-free interest rate of 1.59%, expected life of 1 year, volatility of 115%, and expected dividend yield of zero. Because the fair value of the note exceed the net proceeds from the \$150k Notes, \$39,172 was recorded to "Financing cost" for the excess of the fair value of the note. As of June 30, 2021 and June 30, 2020, the debt discount was \$0 and \$75,205, respectively. This note has been successfully retired via conversions into shares as of June 30, 2021.

On February 6, 2020, the Company entered into a convertible promissory note and a security purchase agreement dated February 6, 2020, in the amount of \$200,000. The lender was Eagle Equities, LLC. The notes have a maturity of February 6, 2021 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$200,000 Notes was calculated using the Black-Scholes pricing model at \$156,061, with the following assumptions: risk-free interest rate of 1.51%, expected life of 1 year, volatility of 113%, and expected dividend yield of zero. As of September 30, 2020 and June 30, 2020, the debt discount was \$54,728 and \$94,064, respectively. On February 26, 2020, the Company entered into a convertible promissory note and a security purchase agreement dated February 26, 2020, in the amount of \$187,000. The lender was Eagle Equities, LLC. The notes have a maturity of February 6, 2021 and interest rate of 8% per annum and are convertible at a price of 70% of the lowest trading price on the primary trading market on which the Company's Common Stock is then listed for the fifteen (15) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC "Derivatives and Hedging." The fair value of the \$200,000 Notes was calculated using the Black-Scholes pricing model at \$156,061, with the following assumptions: risk-free interest rate of 1.51%, expected life of 1 year, volatility of 113%, and expected dividend yield of zero. As of June 30, 2021 and June 30, 2020, the debt discount was \$0 and \$94,064, respectively. . This note has been successfully retired via conversions into shares as of June 30, 2021.

On April 30, 2020, the Company entered into a convertible promissory note and a security purchase agreement dated April 30, 2020, in the amount of \$205,700. This note carried an Original Discount of 10% or \$18,700 which was included in interest expense at the time of valuation. The lender was Eagle Equities, LLC. The notes have a maturity of April 30, 2021 and interest rate of 8% per annum and are convertible at a price of 78% of the lowest closing bid price on the primary trading market on which the Company's Common Stock is then listed for the twenty (20) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$205,700 Notes was calculated using the Black-Scholes pricing model at \$128,369, with the following assumptions: risk-free interest rate of 0.16%, expected life of 1 year, volatility of 106%, and expected dividend yield of zero. This note was settled as part of a debt settlement with Eagle Equities, LLC in conjunction with the Nightfood Holdings, Inc. financing/refinancing in April 2021.

On June 23, 2020, the Company entered into a convertible promissory note and a security purchase agreement dated June 23, 2020, in the amount of \$205,700. This note carried an Original Discount of 10% or \$18,700 which was included in interest expense at the time of valuation. The lender was Eagle Equities, LLC. The notes have a maturity of June 23, 2021 and interest rate of 8% per annum and are convertible at a price of 78% of the lowest closing bid price on the primary trading market on which the Company's Common Stock is then listed for the twenty (20) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$205,700 Notes was calculated using the Black-Scholes pricing model at \$132,236, with the following assumptions: risk-free interest rate of 0.18%, expected life of 1 year, volatility of 108%, and expected dividend yield of zero. The Company accounted for a loss on refinancing of \$25,722 for unamortized of discount included under line item "Loss on debt extinguishment upon note conversion, net".

This note was settled as part of a debt settlement with Eagle Equities, LLC in conjunction with the Nightfood Holdings, Inc. financing/refinancing in April 2021.

On August 12, 2020, the Company entered into a convertible promissory note and a security purchase agreement dated August 12, 2020, in the amount of \$205,700. This note carried an Original Discount of 10% or \$18,700 which was included in interest expense at the time of valuation. The lender was Eagle Equities, LLC. The notes have a maturity of August 12, 2021 and interest rate of 8% per annum and are convertible at a price of 78% of the lowest closing bid price on the primary trading market on which the Company's Common Stock is then listed for the twenty (20) trading days immediately prior to conversion. The note may be prepaid, but carries a penalty in association with the remittance amount, as there is an accretion component to satisfy the note with cash. The convertible note qualifies for derivative accounting and bifurcation under ASC 815, "Derivatives and Hedging." The fair value of the \$205,700 Notes was calculated using the Black-Scholes pricing model at \$126,029, with the following assumptions: risk-free interest rate of 0.13%, expected life of 1 year, volatility of 101%, and expected dividend yield of zero. This note was settled as part of a debt settlement with Eagle Equities, LLC in conjunction with the Nightfood Holdings, Inc. financing/refinancing in April 2021.

On December 10, 2021, the Company entered into a definitive securities purchase agreement (the "Securities Purchase Agreement or Transaction") with certain accredited and institutional investors (the "Purchasers") for the purchase and sale of an aggregate of: (i) \$1,086,956.52 in principal amount of Original Issue Discount Senior Secured Convertible Notes (the "Notes") for \$1,000,000 (representing a 8% original issue discount) ("Purchase Price") and (ii) warrants to purchase up to 4,000,000 shares of the Company's common stock (the "Warrants") in a private placement (the "Offering"). Each note featured an 8% original issue discount, resulting in net proceeds to the Company of \$500,000 for each of the two notes. The Notes have a maturity of December 10, 2022, an interest rate of 8% per annum, and are convertible at a fixed price of \$.25 per share of Company common stock, with provisions for conversions at a fixed price of \$.20 per share of Company common stock should the closing trading price of our common stock be below \$.20 per share after June 10, 2022, subject to adjustment in the event of (i) stock splits and dividends, (ii) subsequent rights offerings, (iii) pro-rata distributions, and (iv) certain fundamental transactions, including but not limited to the sale of the Company, business combinations, and reorganizations. The Debentures do not have any price protection or price reset provisions with respect to future issuances of securities. These notes are secured by Company assets as well as by a personal stock pledge from CEO Sean Folkson. The Notes have provisions allowing for repayment at any time at 115% of the outstanding principal and interest within the first three months, and 120% of the outstanding principal and interest at any time thereafter.

The Warrants are initially exercisable at 0.25 per share and, are subject to cashless exercise after six months if the shares underlying the Warrants are not subject to an effective resale registration statement. The Warrants are also subject to adjustment in the event of (i) stock splits and dividends, (ii) subsequent rights offerings, (iii) pro-rata distributions, and (iv) certain fundamental transactions, including but not limited to the sale of the Company, business combinations, and reorganizations. The Warrants do not have any price protection or price reset provisions with respect to future issuances of securities.

In connection with Securities Purchase Agreement, the Company will issue to the Placement Agent (as defined below), an aggregate of 878,260 Common Stock purchase warrants (“PA Warrants”). The PA Warrants are substantially similar to the Warrants. The fair value of the PA Warrants at issuance was estimated to be \$170,210 based on a risk-free interest rate of 1.25%, an expected term of 5 years, an expected volatility of 142.53% and a 0% dividend yield.

Spencer Clarke Holdings LLC (“Placement Agent”) acted as the placement agent, in connection with the sale of the securities pursuant to the Securities Purchase Agreement. Pursuant to an engagement agreement entered into by and between the Company and the Placement Agent, the Company agreed to pay the Placement Agent a cash commission of \$100,000. Pursuant to the discussion above, the Company also issued an aggregate of 878,260 PA Warrants to the Placement Agent.

The gross proceeds received from the Offering were approximately \$1,000,000. The cash Placement Agent fees of \$100,000 was paid separately. Also, the Company reimbursed the lead Purchaser \$15,192 for legal fees, which was deducted from the required subscription amount to be paid.

The Company evaluated all of the associated financial instruments in accordance with ASC 815 Derivatives and Hedging. Based on this evaluation, the Company has determined that no provisions required derivative accounting.

In accordance with ASC 470- Debt, the Company first allocated the cash proceeds to the loan and the warrants on a relative fair value basis, secondly, the proceeds were allocated to the beneficial conversion feature.

- Below is a reconciliation of the convertible notes payable as presented on the Company’s balance sheet as of March 31, 2022:

	Principal	Debt Discount	Net Value
	\$	\$	\$
Balance at June 30, 2020	\$ 2,935,400	\$ (605,211)	\$ 2,330,189
Convertible notes payable issued during fiscal year ended June 30, 2021	822,800		822,800
Notes converted into shares of common stock	(1,433,000)		(1,433,000)
Debt discount associated with new convertible notes		(512,993)	(512,993)
Amortization of debt discount		814,769	814,769
True-up adjustment in debt discount and derivative liability		(37,360)	(37,360)
Notes retired due to refinancing	(2,325,200)	340,795	(1,984,405)
Balance at June 30, 2021	-	-	-
Convertible notes payable issued during six months ended December 31, 2021	1,086,957		1,086,957
Debt discount associated with new convertible notes		(1,018,229)	(1,018,229)
Amortization of debt discount		90,852	90,852
Balance at March 31, 2022	\$ 1,086,957	\$ (927,377)	\$ 159,580

Amortization related to debt discount expense for the nine months ended March 31, 2022 and 2021, totaled \$90,852 and \$787,216, respectively and amortization expense for the three months ended March 31, 2022 and 2021, totaled \$78,634 and \$210,429 respectively.

As of March 31, 2022 and June 30, 2021, the unamortized portion of debt discount was \$927,377 and \$0, respectively.

Interest expense for the nine months ended March 31, 2022 and 2021, totaled \$26,570 and \$267,640, respectively, and interest expense for the three months ended March 31, 2022 and 2021, totaled \$21,661 and \$72,110, respectively.

As of March 31, 2022 and June 30, 2021, the accrued interest related to convertible notes was \$26,570 and \$0, respectively.

9. Derivative Liability

Due to the variable conversion price associated with some of these convertible promissory notes disclosed in Note 8 above, the Company has determined that the conversion feature is considered a derivative liability for instruments which are convertible and have not yet been settled. The accounting treatment of derivative financial instruments requires that the Company record the fair value of the derivatives on the date they are deemed to be derivative liabilities.

Below is a reconciliation of the derivative liability as presented on the Company's balance sheet as of June 30, 2021 and March 31, 2022:

Derivative liability as of June 30, 2020	\$ 1,590,638
Initial derivative liability accounted for convertible notes payable issued during the period ended June 30, 2021	512,993
True-up adjustment in debt discount and derivative liability	37,360
Change in derivative liability during the period	(853,329)
Notes retired due to refinancing	(1,287,662)
Derivative liability as of June 30, 2021	\$ -
Change	-
Balance at March 31, 2022	<u>\$ -</u>

Change in derivative liability for the nine months ended March 31, 2022 and 2021, totaled \$0 and \$777,202, respectively and change in derivative liability for the three months ended March 31, 2022 and 2021, totaled \$0 and \$1,039,980, respectively.

As of March 31, 2022, and June 30, 2021, the derivative liability related to convertible notes was \$0 and \$0, respectively.

10. Capital Stock Activity

On October 16, 2013, the Nightfood, Inc. became a wholly-owned subsidiary of Nightfood Holdings, Inc. Accordingly, the stockholders' equity has been revised to reflect the share exchange on a retroactive basis.

Common Stock

The Company is authorized to issue Two Hundred Million (200,000,000) shares of \$0.001 par value per share Common Stock. Holders of Common Stock are each entitled to cast one vote for each Share held of record on all matters presented to shareholders. Cumulative voting is not allowed, the holders of a majority of the outstanding Common Stock can elect all directors, subject to the rights of the holder of Series A Stock described below. Holders of Common Stock are entitled to receive such dividends as may be declared by the Board of Directors out of funds legally available therefore and, in the event of liquidation, to share pro-rata in any distribution of the Company's assets after payment of liabilities. The Board of Directors is not obligated to declare a dividend and it is not anticipated that dividends will be paid unless and until the Company is profitable. Holders of Common Stock do not have pre-emptive rights to subscribe to additional shares if issued by the Company. There are no conversion, redemption, sinking fund or similar provisions regarding the Common Stock. All of the outstanding Shares of Common Stock are fully paid and non-assessable and all of the Shares of Common Stock offered thereby will be, upon issuance, fully paid and non-assessable. Holders of Shares of Common Stock will have full rights to vote on all matters brought before shareholders for their approval, subject to preferential rights of holders of any series of Preferred Stock. Holders of the Common Stock will be entitled to receive dividends, if and as declared by the Board of Directors, out of funds legally available, and share pro-rata in any distributions to holders of Common Stock upon liquidation. The holders of Common Stock will have no conversion, pre-emptive or other subscription rights. Upon any liquidation, dissolution or winding-up of the Company, assets, after the payment of debts and liabilities and any liquidation preferences of, and unpaid dividends on, any class of preferred stock then outstanding, will be distributed pro-rata to the holders of the common stock. The holders of the common stock have no right to require the Company to redeem or purchase their shares. Holders of shares of common stock do not have cumulative voting rights, which means that the holders of more than 50% of the outstanding shares, voting for the election of directors, can elect all of the directors to be elected, if they so choose, and, in that event, the holders of the remaining shares will not be able to elect any of our directors.

- The Company had 90,932,158 and 80,707,467 shares of its \$0.001 par value common stock issued and outstanding as of March 31, 2022, and June 30, 2021, respectively.

Common stock issued during the nine months ended March 31, 2022:

- During the nine months ended March 31, 2022, the Company issued 715,999 shares of common stock for services valued at \$191,023.

During the nine months ended March 31, 2022, the Company reversed an entry relating to 41,308 shares that had previously been allocated for services but remained unissued.

During the nine months ended March 31, 2022, holders of the Company's Series B Preferred Stock converted 1,590 shares of Series B Preferred Stock into 7,950,000 shares of its common stock.

During the nine months ended March 31, 2022, the Company issued 1,600,000 shares from redemption of warrants.

Common stock issued during the nine months ended March 31, 2021:

- During the nine months ended March 31, 2021 the Company issued 16,049,577 shares in regards to debt and interest being converted into stock valued at \$1,467,274.

During the nine months ended March 31, 2021, the Company issued 836,630 shares for services valued at \$131,017.

Preferred Stock

Series A Stock

On July 9 2018, the Company was authorized to issue 1,000,000 shares of \$0.001 par value per share Preferred Stock. Of the 1,000,000 shares, 10,000 shares were designated as Series A Preferred Stock ("Series A Stock"). Holders of Series A Stock are each entitled to cast 100,000 votes for each Share held of record on all matters presented to shareholders.

In addition to his ownership of the common stock, Mr. Folkson owns 1,000 shares of the Series A Stock which votes with the common stock and has an aggregate of 100,000,000 votes.

The Company had 1,000 and 1,000 shares of its \$0.001 par value preferred Series A stock issued and outstanding as of March 31, 2022, and June 30, 2021, respectively.

Series B Stock

In April 2021, the Company designated 5,000 shares of its Preferred Stock as Series B Preferred Stock ("B Stock"), each Series B share of which is convertible into 5,000 shares of common stock and 5,000 non-detachable warrants with a strike price of \$.30

The Company had 3,410 and 4,665 shares of its \$0.001 par value Series B Preferred Stock issued and outstanding as of March 31, 2022, and June 30, 2021 respectively.

During the nine months ended March 31 2022, the Company sold 335 shares of its \$0.001 par value Series B Preferred Stock for gross cash proceeds of \$335,000. These proceeds were used for operating capital. The Series B stock meets the criteria for equity classification and is accounted for as equity transactions. Specifically, among other factors, this qualifies as equity because redemption is not invoked at the option of the holder and the Series B stock does not have to be redeemed on a specified date.

During the nine months ended March 31, 2022, holders of the Company's Series B Preferred Stock converted 1,590 shares of Series B Preferred Stock into 7,950,000 shares of its common stock.

Dividends

The Company has never declared dividends, however as set out below, during the nine months ended March 31, 2022, upon issuance of a total of 335 shares of Series B Preferred stock the Company recorded a deemed dividend as a result of beneficial conversion feature associated with the transaction.

In connection with certain conversion terms provided for in the designation of the Series B Preferred Stock, pursuant to which each share of Series B Preferred Stock is convertible into 5,000 shares of common stock and 5,000 warrants, the Company recognized a beneficial conversion feature upon the conclusion of the transaction in the amount of \$4,375,860. The beneficial conversion feature was treated as a deemed dividend, and fully amortized on the transaction date due to the fact that the issuance of the Series B preferred stock was classified as equity.

11. Warrants

The following is a summary of the Company's outstanding common stock purchase warrants.

During the nine months ended March 31, 2022, holders of the Company's Series B Preferred Stock converted 1,590 shares of Series B Preferred Stock into 7,950,000 shares of its common stock, along with 7,950,000 warrants issued to those holders with an initial exercise price of \$.30 per share.

During the nine months ended March 31, 2022, 4,000,000 warrants were issued to the holder of the convertible notes in conjunction with the notes with an initial exercise price of \$.25 per share, and 878,260 warrants issued to the placement agent with an initial exercise price of \$.25 per share. The Company valued these warrants using the Black Scholes model utilizing a 143.39% volatility and a risk-free rate of 1.25%

During the nine months ended March 31, 2022, the Company entered into a warrant agreement with one of the Company's Directors issuing 100,000 warrants at a strike price of \$0.2626 having a term of five years. The Company valued these warrants using the Black Scholes model utilizing a 151.07% volatility and a risk-free rate of 0.79%.

During the nine months ended March 31, 2022, the Company entered into an Agreement For Shareholder Lock-Up And Acquisition of Warrants (the "Lock-Up Agreement"), with its Chairman, CEO and largest shareholder, Sean Folkson issuing 400,000 warrants at a strike price of \$0.30 having a term of one year. The Company valued these warrants using the Black Scholes model utilizing a 80.67% volatility and a risk-free rate of 0.89%.

Certain warrants in the above table include dilution protection for the warrant holders, which could cause the exercise price to be reduced as a result of a financing event at a valuation below the exercise price in effect at the time. For example, as a result of the convertible note financing, we completed in December 2021 which would allow the new noteholders to convert their debt to shares of common stock at an exercise price of \$.25/share, some of the \$.30 warrants outstanding in the table above had their exercise price reduced from \$.30 to \$.2952. This reduction of less than half a penny in the exercise price of the 25,000,000 warrants associated with our Class B Preferred stock would result in proceeds to the Company of \$7,380,000 rather than \$7,500,000 should all those warrants be exercised. The result of the warrant exercise price downward adjustment on modification date was treated as a deemed dividend and fully amortized on the transaction date, and the Company recorded \$68,722 to additional paid in capital and retained earnings for a null effect on the Company's balance sheets.

The aggregate intrinsic value of the warrants as of March 31, 2022 is \$3,750.

Exercise Price	June 30, 2021	Issued	Repricing	Expired	Redeemed	March 31, 2022
\$ 0.01	1,600,000				(1,600,000)	-
\$ 0.15	500,000			-		500,000
\$ 0.20	2,250,000					2,250,000
\$ 0.25		4,878,260				4,878,260

\$ 0.30	2,650,000	400,000	(2,250,000)	(400,000)		400,000
\$ 0.40	150,000			-		150,000
\$ 0.50	500,000			-		500,000
\$ 0.75	300,000			(300,000)		-
\$ 1.00	100,000			(100,000)		-
	<u>8,050,000</u>	<u>13,328,260</u>		<u>(800,000)</u>	<u>(1,600,000)</u>	<u>18,978,260</u>

12. Fair Value of Financial Instruments

Cash and Equivalents, Receivables, Other Current Assets, Short-Term Debt, Accounts Payable, Accrued and Other Current Liabilities.

The carrying amounts of these items approximated fair value.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. To increase the comparability of fair value measures, Financial Accounting Standards Board (“FASB”) ASC Topic 820-10-35 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements).

Level 1—Valuations based on quoted prices for identical assets and liabilities in active markets.

Level 2—Valuations based on observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3—Valuations based on unobservable inputs reflecting our own assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

The Company’s financial instruments, including cash and cash equivalents, accounts payable and accrued liabilities, are carried at historical cost. At March 31, 2022, and June 30, 2021, the carrying amounts of these instruments approximated their fair values because of the short-term nature of these instruments. Derivative instruments are carried at fair value, generally estimated using the Trinomial Tree option pricing formula.

13. Commitments and Contingencies:

The Company has entered into certain consulting agreements which carry commitments to pay advisors and consultants should certain events occur. An agreement is in place with one Company advisor that called for total compensation over the four-year Advisor Agreement of 500,000 warrants with an exercise price of \$.15 per share, of which all have vested.

CEO Sean Folkson has a twelve-month consulting agreement which went into effect on January 1, 2022, which effectively served as an extension to, and reset of, his previous twelve-month consulting agreement with minor modifications to the available bonuses. Both contracts had provisions which would reward him with bonuses earned of 1,000,000 warrants at a strike price of \$.50 should the Company record its first quarter with revenues over \$1,000,000, an additional 3,000,000 warrants with a \$.50 strike price when the Company records its first quarter with revenues over \$3,000,000, and an additional 5,000,000 warrants with a \$1 strike price when the Company records its first quarter with revenues over \$5,000,000. Mr. Folkson will also be awarded 500,000 warrants with a strike price of \$.50 should the Company enter into a product development or distribution partnership with a multi-national food & beverage conglomerate during the twelve-month term of the Agreement, and 1,000,000 Warrants with a \$.50 strike price should the Company and its subsidiaries on a consolidated basis generate \$1,000,000 or more in Net Revenue through sales of product through “non-traditional” retail channels, such as hotels and college campuses, during the twelve-month term of this agreement. As of March 31, 2022, those conditions were not met and therefore nothing was accrued related to this arrangement.

Under Mr. Folkson’s consulting agreement, in January of 2023, an analysis will be done of the Company’s consolidated Calendar Year 2022 Gross Sales. Should the Company have achieved consolidated Gross Sales in excess of \$3,000,000 in the Calendar Year 2022, Consultant’s monthly consulting rate of \$6,000 per month as stated in this agreement shall be adjusted to \$12,000 per month, retroactive to January 1, 2022.

Litigation: From time to time, the Company may become involved in various lawsuits and legal proceedings, which arise, in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. The Company is not aware of any such legal proceedings that it believes will have, individually or in the aggregate, a material adverse effect on its business, financial condition or operating results.

14. Related Party Transactions

On January 20, 2022, the Company entered into an Agreement For Shareholder Lock-Up And Acquisition of Warrants (the “Lock-Up Agreement”), with its Chairman, CEO and largest shareholder, Sean Folkson. For purposes of the Lock-Up Agreement, Mr. Folkson is the direct or indirect owner of 16,776,644 share of the Company’s common stock (the “Shares”), and Mr. Folkson has agreed to not transfer, sell, or otherwise dispose of any Shares through February 4, 2023. The Lock-Up Agreement is substantially similar to, and serves as an extension of, the lock-up agreement currently in place between the Company and Mr. Folkson, which expired in accordance with its terms on February 4, 2022.

The Lock-Up Agreement further provides, in exchange for the agreement to lock up the Shares, that Mr. Folkson shall receive warrants to acquire 400,000 shares of Company common stock at an exercise price of \$.30 per share, which warrants carry a twelve month term and a cashless provision, and will expire if not exercised within the twelve month term.

During the nine months ending March 31, 2022, and 2021, Mr. Folkson accrued consulting fee of \$6,000 per month which the aggregate of \$54,000 is reflected in general and administrative. Accrued expenses – related party with a balance of \$3,000 and \$3,000 at March 31, 2022 and June 30, 2021, respectively.

On December 8, 2017, Mr. Folkson purchased Warrants, at a cost of \$.15 per Warrant, to acquire up to 80,000 additional shares of Company stock at a strike price of \$.20, and with a term of three (3) years from the date of said agreement. This purchase resulted in a reduction in the accrued consulting fees due him by \$12,000. Those warrants were not exercised during that timeframe and have expired. During the second quarter 2019 Mr. Folkson purchased 400,000 shares of stock at a price of \$0.30 per share, valued at \$120,000 which was charged to his accrual.

In addition, the Company made bonuses available to Mr. Folkson upon such events as the Company hitting certain revenue milestones of \$1,000,000 in a quarter, \$3,000,000 in a quarter, and \$5,000,000 in a quarter, and other potential bonuses. Achieving such milestones would earn Mr. Folkson warrants with a \$.50 and \$1 strike price which would need to be exercised within 90 days of the respective quarterly or annual filing. As of March 31, 2022, those conditions were not met and therefore nothing was accrued related to this arrangement.

15. Subsequent Events

- Subsequent to March 31, 2022, the Company issued 100,000 shares of Company common stock to a consultant for services rendered.
- Subsequent to March 31, 2022, holders of Company Series B Preferred Stock converted an aggregate of 150 Class B Shares into 750,000 shares of Company common stock.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD LOOKING STATEMENT INFORMATION

Certain statements made in this Quarterly Report on Form 10-Q involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. You can identify these statements by the fact that they do not relate strictly to historical or current facts, and use words such as "anticipate," "believe," "estimate," "expect," "forecast," "may," "should," "plan," "project," "will" and other words of similar meaning. The forward-looking statements included herein are based on current expectations that involve numerous risks and uncertainties. Our plans and objectives are based, in part, on assumptions involving judgments with respect to, among other things, future economic, competitive and market conditions, technological developments related to business support services and outsourced business processes, and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control.

Although we believe that our assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate and, therefore, there can be no assurance that the forward-looking statements included in this Quarterly Report on Form 10-Q will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included herein particularly in view of the current state of our operations, the inclusion of such information should not be regarded as a statement by us or any other person that our objectives and plans will be achieved. Factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements include, but are not limited to, the factors set forth under the headings "Business" and "Risk Factors" within our Annual Report on Form 10-K for the fiscal year ended June 30, 2021, as well as the other information set forth herein.

OVERVIEW

What you eat before bed matters. Nightfood delivers sleep-friendly nighttime snacking.

Research indicates that humans are biologically hard-wired to load up on sweets and fats at night. Loading a surplus of calories (fuel) into the body before the long nightly fast is believed to be an outdated survival mechanism from our hunter-gatherer days. Unfortunately, while modern consumers know this type of consumption isn't necessary for survival, willpower also weakens at night, so consumers are more likely to succumb to these nighttime cravings for excess "survival calories".

As a result, over 85% of adults report snacking regularly between dinner and bed, resulting in an estimated 700 million nighttime snack occasions weekly, and an annual spend on night snacks of over \$50 billion. Because of our hard-wired evolutionary preferences for calorie-dense choices that increase the odds of short-term survival, the most popular nighttime snacks are ice cream, cookies, chips, and candy. These are all understood to be generally unhealthy. They can also impair sleep quality.

In recent years, billions of dollars of consumer spend have shifted to better-for-you versions of consumers' favorite snacks. But we do not believe any of those products were specifically formulated to nutritionally support better sleep. Nightfood snacks are not only formulated to be better-for-you, but they're also formulated by sleep experts and nutritionists to provide a better nutritional foundation for sleep.

Almost half of all snacking takes place between dinner and bed. Nutrition is an important part of sleep-hygiene because what one eats at night impacts sleep. Recent industry surveys indicated that most modern consumers have begun to seek functional benefits from their snacks, and most consumers would also prefer better sleep.

As the pioneers of the nighttime snacking category, Nightfood accepts the responsibility to educate consumers and build the awareness required to grow the nighttime segment of the overall snack market. Along with that responsibility comes the opportunity to be the category king. We envision a future where nighttime specific, sleep-friendly snacks comprise a multi-billion-dollar segment of the estimated \$120 billion American snack market.

Management believes latent consumer demand exists for better nighttime snacking options, and that a new consumer category, consisting of nighttime specific snacks, is set to emerge in the coming years. This belief is supported by research from major consumer goods research firms such as IRI Worldwide, and Mintel, who identified nighttime specific foods and beverages as one of the “most compelling and category changing trends” for 2017 and beyond. In recent years, CEO’s and other executives from major consumer goods conglomerates such as Nestle, PepsiCo, Mondelez, and Kellogg’s have commented on consumer nighttime snack habits and alluded to the opportunity that might exist in solving this problem for the marketplace.

Nightfood has established a highly credentialed Scientific Advisory Board consisting of sleep and nutrition experts to drive product formulation decisions and provide consumer confidence in the brand promise. The first member of this advisory board was Dr. Michael Grandner, Director of the Sleep and Health Research Program at the University of Arizona. Dr. Grandner has been conducting research on the link between nutrition and sleep for over fifteen years, and he believes improved nighttime nutritional choices can improve sleep, resulting in many short and long-term health benefits. In March of 2018, the Company added Dr. Michael Breus to their Scientific Advisory Board. Dr. Breus, known to millions as The Sleep Doctor™, is believed to be the Nation’s most trusted authority on sleep. He regularly appears in the national media to educate and inform consumers so they can sleep better and lead happier, healthier, more productive lives. In July, 2018, we completed our Scientific Advisory Board with the addition of Lauren Broch, Ph.D, M.S. Dr. Broch is a sleep therapist and former Director of Education & Training at the Sleep-Wake Disorders Center at Weill Cornell Medical College. Dr. Broch also has a master’s degree in human nutrition. This combination allowed her to play an important role in the reformulation of our nutrition bars, the development of Nightfood ice cream, and formulations of future Nightfood snacks currently in development. These experts work with Company management to ensure Nightfood products deliver on their nighttime-appropriate, and sleep-friendly promises.

Management envisions the Nightfood brand ultimately as a “platform brand”, meaning future snack offerings are expected to be introduced that would fall outside the ice cream or frozen food category. Possibilities exist to expand the product line into additional snack formats that are popular with consumers at night, including things like cookies, chips, and other formats. The Company currently has some of the aforementioned snack formats in development.

Compared to regular ice cream, Nightfood is formulated with more tryptophan, more vitamin B6, more calcium, magnesium, and zinc, more protein and more prebiotic fiber. Nightfood also contains less fat, less sugar, and fewer calories than traditional ice cream, and is lactose free.

Each new Nightfood snack format would be expected to deliver sleep-friendly snacking in a way that is most appropriate for that format. For example, Nightfood chips would not necessarily contain significantly more tryptophan than other brands of chips but may be more sleep-friendly in other ways.

In February of 2019, it was announced that Nightfood had won the 2019 Product of the Year Award in the ice cream category in a Kantar innovation survey of over 40,000 consumers. In June of 2019, it was announced that Nightfood won both the Best New Ice Cream and Best New Dairy Dessert awards at the World Dairy Innovation Awards.

In November of 2021, Nightfood won the Real California Milk Excelsior Dairy Innovation competition, with a top prize of \$150,000 in marketing support. Executives and judges from the California Milk Advisory Board and corporate entities such as Hershey’s, Coca-Cola, and Whole Foods commended the unique problem the Nightfood brand addresses for consumers, and the opportunities and strategic advantages afforded by widespread hotel distribution for a brand pioneering sleep-friendly nighttime snacking.

Nightfood has received media coverage in outlets such as The Today Show, Oprah Magazine, The Rachael Ray Show, Food Network Magazine, The Wall Street Journal, USA Today, The Washington Post, Fox Business News, and many more media outlets.

RECENT EVENTS - DEVELOPMENT PLANS

Hotel Distribution

In pioneering the nascent sleep-friendly nighttime snacking category, Nightfood is in the process of executing a strategic pivot. The Company is temporarily shifting growth focus away from the crowded, expensive, and highly competitive supermarket vertical while targeting brand, revenue, and category growth through national hotel distribution.

According to The American Hotel & Lodging association, there are an estimated 56,000 hotels in the United States (this does not include motels, which are estimated at approximately 34,000 locations). By contrast, Supermarket News recently reported that there are approximately 26,000 traditional supermarkets in the United States.

The five largest hotel companies combine for over 26,000 hotel locations in the United States. Management believes this significant concentration, and the fact that corporate-level relationships have been established with two of these five global hotel companies, can lead to significant distribution gains in coming months.

Management believes Nightfood is uniquely advantaged over other snack brands in the potentially lucrative hospitality vertical due to an inherent and implied obligation that exists for hotels to support better sleep for their guests.

Nightfood was invited to participate in a 2021 retail pilot test of Nightfood pints for sale in hotel lobby shops, initiated and conducted by a large and prestigious international hospitality company.

That test was declared a success by that international hospitality company in summer of 2021, and Nightfood ice cream pints are now in the midst of a national hotel rollout. In April, 2022, the Company received 21 purchase orders from a leading distributor of food and beverages to the hospitality vertical, one for each of their 21 regional distribution centers. The distributor business model is typically to order the smallest amount of inventory needed to fulfill immediate customer demand. As such, the aggregate size of these purchase orders was approximately \$45,000, enough to supply a few hundred hotel properties with Nightfood ice cream for a few weeks. Industry norms would dictate that significant increases in the number of retail points of distribution would lead to significant increases in average order size.

As of the time of this filing, Nightfood ice cream pints are being introduced nationally in our first hotel chain, a major extended-stay hotel brand with approximately 500 locations in the United States.

On April 22, 2022, it was announced that the Company had secured “recommended brand” status with Remington Hotels. Remington is a leading hotel management company which manages 121 hotels across 28 states, and representing 25 brands, including Marriott, Hilton, Wyndham, Intercontinental, Westin, Wyndham, Doubletree, Courtyard, Crowne Plaza, Four Points, Hyatt Regency, Renaissance, Curio, Embassy Suites, Fairfield Inn, Hampton Inn, Hilton Garden Inn, Holiday Inn, Residence Inn, Springhill Suites, and more.

On April 25, 2022, the Company announced a new corporate-initiated retail pilot test of Nightfood ice cream pints by a second global hotel company, with thousands of locations in the United States. Management believes a successful test could lead to distribution in multiple additional hotel chains potentially representing thousands of properties.

The Company also recently signed its first agreement with a major hotel industry group purchasing organization (“GPO”) which services over 10,000 hotel properties in the United States. We are currently in discussions with other GPOs through our relationship with iDEAL Hospitality Partners.

In September of 2021, the Company had stated the goal of having secured distribution for Nightfood snacks in 7,500 hotels by July 31, 2022. Because of modifications to launch timelines by our initial hotel partner, we have adjusted the timing of that target so that our goal is now to secure distribution in 7,500 hotel properties within nine months of our initial hotel introduction. It remains our goal to have Nightfood established as a de facto hotel industry standard, with distribution approaching 20,000 hotels by the end of 2023.

In preparing for the projected increase in volume, the Company is in the process of onboarding two new ice cream pint production facilities to replace the contract manufacturer that has produced Nightfood ice cream pints to date. As the majority of Nightfood ice cream pint sales in coming quarters project to be concentrated on the two flavors in hotel distribution (Cookies n’ Dreams and Midnight Chocolate), the Company is engaging a manufacturer with high-speed production lines that can produce double the product daily of our previous manufacturer. The initial production run at that facility is tentatively scheduled for the week of June 6, 2022. The other facility is expected to be used for other pint flavors and ice cream novelties and is expected to come online during July or August.

The Company does not expect any disruption to inventory or supply as a result of these planned transitions.

The unit economics of hotel distribution project to be materially superior to the economics of operating in the supermarket space. Line items such as slotting fees, advertising, and price promotions (both to consumers and the trade) make the supermarket vertical a much more expensive, and less profitable, place to do business compared to hotels.

Based on the results from the 2021 test, we anticipate that distribution of our ice cream pints in approximately 4,000 hotel locations would bring the company to profitability. Should we succeed in securing hotel distribution for additional snack formats, we would expect an increase in hotel revenue per property, meaning fewer properties would be needed to reach break-even.

To take maximum advantage of the opportunity presented by Nightfood's expected widespread hotel distribution, the Company is developing additional snack formats to supplement ice cream pints in that vertical. These include single-serve ice cream sandwiches as well as snacks in other, non-frozen, formats such as cookies and chips.

We have already received confirmation of interest from decision makers at a major hotel chain in testing and adding additional these Nightfood snack formats currently under development. It is believed that securing distribution for such additional snack formats in our hotel properties would help the Company reach its 2023 revenue target of \$10 in wholesale revenue per hotel per day.

In addition to projected profitability resulting from a successful hotel roll-out, we believe that having additional snack formats available in hotels creates a greater opportunity for consumer visibility, awareness, and trial. Widespread hotel distribution across multiple snack formats projects to accelerate consumer adoption of the nighttime snack category, driving awareness that what one eats at night can impact their sleep quality.

We intend to leverage our national hotel distribution to advance the narrative to consumers that what you eat, especially at night, can impact your sleep. We further believe that distribution in leading global hotel chains will serve as an economic moat, providing the Nightfood brand with a measure of insulation against competitors. At the same time, the de facto endorsement from the world's most trusted hotel brands would translate to credibility for our brand, helping to establish and maintain Nightfood as the nighttime snacking "category king".

Supermarket Distribution

Nightfood is currently available in approximately 300 supermarkets, including Jewel-Osco (Chicagoland), Rouses Markets (New Orleans & Gulf Coast), Central Market (Dallas, Fort Worth, Austin, San Antonio, Houston), and Metropolitan Market, Market of Choice and Northwest Grocers in the Pacific Northwest.

We have shifted our primary focus to hotel distribution and believe that successful hotel presence will support future supermarket success.

We continue to work with our long-term partners at these select supermarket chains to devise and test programs that can drive supermarket growth.

SLOTING FEES

Slotting fees are fees occasionally charged by supermarkets and certain retail distributors to add a new product into their product assortment.

Accounting standards require exclusion on the income statement of Gross Sales made to a customer to whom the Company is paying slotting fees and other expenses including promotions, rebates, and coupons. In those situations, the Gross Sales number is reduced, dollar for dollar, by the sum of these fees. These fees do not appear on the income statement as an expense. Rather, they are applied against Gross Sales, resulting in Net Revenue, as shown below. The netting of Gross Sales against the total of these fees, as described and shown below, results in the Net Revenue number at the top of the income statement. This is not a reflection of the amount of product shipped to customers, but rather a function of the way certain sales are accounted for when those sales are made to customers who are charging slotting fees.

Additional supermarket distribution would likely result in additional future slotting fees. Hotel distribution of Nightfood is not expected to lead to significant slotting fees, if any. Slotting fees are normal and customary in the consumer goods industry and are fees that certain retailers and distributors charge to introduce a new product into their available assortment.

In some cases, slotting fees, also called "new item placement fees" or "new item placement allowances" can be nominal. In other situations, slotting fees for certain retail and distribution partners could run hundreds of thousands of dollars.

INFLATION

Current and ongoing inflation can be expected to have an impact on our operating costs. Costs of certain ingredients and packaging have increased recently, and we expect to evaluate a wholesale price increase in the coming months. Furthermore, a prolonged period of inflation could possibly cause a general economic downturn and negatively impact our results.

SEASONALITY

As an early-stage and growing brand, the full impact of seasonality on our Company might not be fully understood for several annual cycles. Hotels historically have their highest occupancy rates in the summer, and a pattern could develop of higher consumer spend on Nightfood products during the summer months for the period of time where the majority of the Company's sales are derived from snacks sold into hotel distribution. Over time, should the Company successfully expand into more distribution verticals and into additional snack formats, it is possible that such potential impacts of seasonality could lessen.

CORONAVIRUS (COVID-19)

There is still potential uncertainty resulting from the outbreak of the novel coronavirus (COVID-19) (the "Pandemic"), including those potentially related to measures to reduce its spread, and the impact on the economy. Rates of unemployment, recession, inflation, and other possible unforeseen factors could also have an impact.

From both public statements, and conversations between Nightfood management and current and former executives from certain global food and beverage conglomerates, it has been affirmed to management that there is increased strategic interest in the nighttime nutrition space as a potential high-growth opportunity, partially due to ongoing declines in consumer sleep quality and increases in at-home nighttime snacking, both trends believed to be accelerated by COVID.

The Company has experienced no material issues with supply chain or logistics resulting from COVID. Order processing function has been consistent with historical norms. As stated in Development Plans below, the Company is in the process of transitioning contract manufacturers to handle increased demand and does not anticipate any disruption from this transition as a result of COVID or any other causes.

It is possible that the fallout from the Pandemic could make it more difficult in the future for the Company to access required growth capital, possibly rendering the Company unable to meet certain debts and expenses.

More directly, the Pandemic has impaired the Company's ability to execute certain in-store and out-of-store marketing initiatives within the normal course of supermarket business. For example, since the inception of the Pandemic, the Company was unable to conduct in-store demonstrations and unable to participate in local pregnancy, baby expos, and health expos that were originally intended to be part of our marketing mix.

Additionally, with more consumers shopping online, both for delivery or at-store pickup, the opportunity for shoppers to learn about new brands at the supermarket shelf has been somewhat diminished. Management is working to identify opportunities to build awareness and drive supermarket trial and growth under these new circumstances, while simultaneously executing a strategic pivot to focus on hotel distribution for immediate growth.

We experienced some Pandemic-related delays to our national hotel rollout. However, hotel sales testing conducted by a leading global hotel brand showed strong sales velocities in hotel lobby shops during early and mid-2021. As the testing itself was conducted during the Pandemic, we are of the belief that strong sales can be expected as the rollout is executed. We do not expect significant hotel shutdowns or reductions in hotel occupancy the likes of which were seen in the early and middle part of 2020, unless the Pandemic again surges through new variants or for other reasons.

It is impossible to know what the future holds with regard to the Pandemic, both for the Company and in the broader sense. Emergence of recent variants such as Delta and Omicron have shown us that there remain many uncertainties regarding the Pandemic, and the Company is closely monitoring the impact of the Pandemic on all aspects of its business, including how it will impact its customers, vendors, and business partners. It is difficult to know if the Pandemic has materially impacted the results of operations of the Company, and it is unable to predict the impact that the Pandemic will have on its financial position and operating results due to numerous uncertainties. The Company expects to continue to assess the evolving impact of the Pandemic and intends to make adjustments accordingly, if necessary.

RESULTS OF OPERATIONS FOR THE THREE MONTH PERIODS ENDED MARCH 31, 2022 and 2021.

For the three months ended March 31, 2022 and 2021 we had Gross Sales of \$176,020 and \$181,172 and Net Revenues (Net Revenues are defined as Gross Sales, less Slotting Fees, Sales Discounts, and certain other revenue reductions) of \$127,173 and \$96,726, respectively, and incurred an operating loss of \$333,473 and \$391,240, respectively.

	Three Months Ended March 31,	
	2022	2021
Gross product sales	\$ 176,020	\$ 181,172
Less:		
Slotting fees	\$	\$ (4,435)
Sales discounts, promotions, and other reductions	(48,847)	(80,011)
Net Revenues	\$ 127,173	\$ 96,726

In the three months ended March 31, 2022, Grocery Outlet was the Company's largest customer, with Gross Sales of \$50,994, and Walmart, which is not currently an active customer of the Company, was the Company's second largest customer, with Gross Sales of \$44,330. The Company built inventory in early 2021 to prepare for planned expansion, including our national hotel rollout which was originally expected to occur in Summer of 2021. Through the Company's sales to Grocery Outlet, which buys surplus manufacturer inventory at a discount, some of that excess inventory was relieved.

We expect that our Gross Sales attributable to supermarket sales will be lower in the next few quarters due to having been rotated out of Walmart and the fact that Grocery Outlet sales are episodic in nature. However, we expect that anticipated hotel expansion will offset the loss of these sales, resulting in higher gross sales and net revenues in future quarters. To quantify, gross sales to Walmart totaled \$44,330 during the three months ended March 31, 2022. During this time, we were in over 900 Walmart stores. Based on the results of the 2021 hotel retail pilot test, our projections indicate that new distribution in approximately 200-300 hotel locations would bring an increase in gross sales that would offset the decrease from this reduction in Walmart and supermarket distribution, with significantly stronger gross and net margins. Hotel sales project to be significantly more profitable on a per unit basis, as sales are expected to be conducted at a higher wholesale price, and line items such as slotting, advertising, and pricing promotions project to be greatly reduced or entirely eliminated.

For the three months ended March 31, 2022 and 2021, Cost of Product Sold increased to \$146,766 from \$102,922 as we discounted certain product prior to expiration of its code date and executed a write-off of unusable packaging.

For the three months ended March 31 2022 and 2021, Selling, General, and Administrative expenses decreased to \$313,880 from \$374,645. This decrease was largely due to decreases in certain consulting fees related to capital formation and marketing activities.

For the three months ended March 31 2022 and 2021, total Operating Expenses decreased to \$460,646 from \$487,567. This is due largely to the decrease in Selling General, and Administrative expenses mentioned in the previous paragraph.

For the three months ended March 31 2022 and 2021, total Other Expenses decreased to \$100,295 from \$1,548,474. A large component of the other expenses category from 2021 is expenses related to financing events.

For the three months ended March 31 2022 and 2021 we incurred net losses of \$433,768 and \$1,910,613, respectively. This decrease in net losses is due largely the absence in the current quarter of expenses that existed in the previous year related to the financing event in April, 2021.

RESULTS OF OPERATIONS FOR THE NINE MONTH PERIODS ENDED MARCH 31, 2022 and 2021.

For the nine months ended March 31, 2022 and 2021 we had Gross Sales of \$470,019 and 643,359 and Net Revenues of \$321,000 and \$270,919, respectively, and incurred an operating loss of \$1,645,538 and \$1,379,102, respectively.

	Nine Months Ended March 31,	
	2022	2021
Gross product sales	\$ 470,019	\$ 643,359
Less:		
Slotting fees		\$ (190,295)
Sales discounts, promotions, and other reductions	(147,810)	(182,145)
Net Revenues	\$ 321,000	\$ 270,919

The decrease in Gross Sales, is largely due to the fact that we had fewer traditional supermarket points of distribution ordering product during the nine months ended March 31, 2022 due to being rotated out of Harris Teeter and Shaw's, as well as decreased promotional activity at the point of purchase. While Nightfood ice cream was available in Walmart stores during the nine months ended March 31, 2022, the majority of product the Company sold to Walmart occurred during the three month period from April 1, 2021 through June 30, 2021, and is therefore not reflected in either of the nine month periods shown above.

We expect that our Gross Sales attributable to supermarket sales will be lower in the next few quarters due to having been rotated out of Walmart and the fact that Grocery Outlet sales are episodic in nature. However, we expect that anticipated hotel expansion will offset the loss of these sales, resulting in higher gross sales and net revenues in future quarters. Furthermore, the hotel sales project to be significantly more profitable on a per unit basis, as sales are expected to be conducted at full wholesale pricing, and line items such as slotting, advertising, and pricing promotions project to be greatly reduced or entirely eliminated.

For the nine months ended March 31, 2022, and 2021, Cost of Product Sold decreased to \$359,745 from \$443,083 as commensurate with lower gross sales.

For the nine months ended March 31, 2022, and 2021, Selling, General, and Administrative expenses increased to \$1,606,793 from \$1,206,938. To fully capitalize on the hotel opportunity, we have made certain investments in marketing consulting related to category development and design, as well as investing in the development of additional snack formats which the Company believes can more rapidly scale revenue and consumer trial. Those investments, along with elevated spending on advertising and promotion during the first two quarters of the current fiscal year, accounts for much of this increase.

For the nine months ended March 31, 2022, and 2021, Total Operating Expenses increased to \$1,966,538 from \$1,650,021. This is due largely to the increase in Selling General, and Administrative expenses mentioned in the previous paragraph.

For the nine months ended March 31, 2022, and 2021, total Other Expenses decreased to \$402,824 from \$2,074,040. A large component of the other expenses category from 2021 is expenses related to financing events.

For the nine months ended March 31, 2022, and 2021 we incurred net losses of \$2,048,362 and \$3,453,142 respectively. This decrease in net losses is due largely the absence in the current quarter of expenses that existed in the previous year related to the financing event in April, 2021.

Customers

During the nine months ended March 31, 2022, the Company had one customer account for approximately 31% of the gross sales. One other customer accounted for approximately 24% of gross sales, and one other customer accounted for approximately 14% of gross sales. During the nine months ended March 31, 2021, one customer accounted for approximately 45% of the gross sales.

During the three months ended March 31, 2022, the Company had one customer account for approximately 44% of the gross sales. During the three months ended March 31, 2021, one customer accounted for approximately 36% of the gross sales while three other customers accounted for over 10% of gross sales.

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2022, we had cash on hand of \$522,057, receivables of \$85,113 and inventory value of \$291,789.

While most of the Company's internal financial model scenarios project it reaching profitability early in Fiscal 2023, cash on hand does not project to be adequate to satisfy the Company's mid-range working capital needs to get it both to profitability and also cash flow positive. As a result, the Company anticipates raising capital early in Fiscal 2023.

The Company believes that forthcoming business developments along with its current capitalization structure will enable it to successfully secure required financing to continue its growth in the hotel vertical.

Because the business has limited operating history and sales, no certainty of continuation can be stated. Management has devoted a significant amount of time in the raising of capital from additional debt and equity financing. However, the Company's ability to continue as a going concern will again be dependent upon raising additional funds through debt and equity financing and generating revenue. There are no assurances the Company will receive the necessary funding or generate revenue necessary to fund operations long-term.

The Company cannot give any assurance that it will, in the future, be able to achieve a level of profitability from the sale of its products to sustain its operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern for one year from the date the financials are issued. The accompanying financial statements do not include any adjustments to reflect the possible future effects on recoverability and reclassification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Since our inception, we have sustained operating losses. During the nine months ended March 31, 2022, we incurred a net loss of \$2,048,362 (comprised of operating loss of \$1,645,538 and other expenses of \$402,824) compared to \$3,453,142 (comprised of operating loss of \$1,389,501 and other expenses of \$2,074,040, most of which is comprised of changes in derivative liability and amortization of Beneficial Conversion Features related to convertible note financing and changes in the share price of the common stock) for the nine months ended March 31, 2021. A significant portion of these losses is largely a function of the way certain financing activities are recorded and does not represent actual operating losses.

During the nine months ended March 31, 2022, net cash used in operating activities was \$1,728,876 compared to \$841,133 for the nine months ended March 31, 2021. The reason for the increase in recorded net cash used in operating activities is largely due to the fact that more cash was allocated to current assets and current liabilities in the current quarter than in the prior year.

During the nine months ended March 31, 2022, net cash of \$0 was used in investing activities, compared to \$0 for the nine months ended March 31, 2021.

During the nine months ended March 31, 2022, net cash aggregating \$1,209,034 was provided by financing activities, compared to \$716,692 for the nine months ended March 31, 2021.

From our inception in January 2010 through March 31, 2022, we have generated an accumulated deficit of approximately \$27,603,890, compared to \$25,196,871 from inception through June 30, 2021. This is not debt, and this is not an amount that needs to be paid out at any point in the future. An accumulated deficit reflects a negative balance of retained earnings and an accumulation of historical losses over time, related to both operations and financing activities. It is not unusual for growing companies to have significant accumulated deficit (also known as negative retained earnings), even after turning profitable. Many large, fast growing, and successful companies have recently reported accumulated deficits, such as Warby Parker, The Honest Company, Beyond Meat, Roblox, Robinhood, Sweetgreen, Oatly, Rivian, Celsius Holdings, and Chobani, as well as Tesla (as recently as their 2020 fiscal year). In our case, like many of these others, an accumulated deficit is a function of losses sustained over time, along with the costs associated with raising operating capital.

Assuming we raise additional funds and continue operations, we expect to incur additional operating losses during the next one to three quarters and possibly thereafter. We plan to continue to pay or satisfy existing obligation and commitments and finance our operations, as we have in the past, primarily through the sale of our securities and other forms of external financing until such time that we are able to generate sufficient funds from the sale of our products to finance our operations, of which we can give no assurance.

We intend to rely on the sale of stock and the issuance of new debt, to fund our operations. If we are unable to raise cash through the sale of our stock, we may be required to severely restrict our operations.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations is based on our unaudited condensed consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these unaudited condensed consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. On an on-going basis, we evaluate past judgments and our estimates, including those related to allowance for doubtful accounts, allowance for inventory write-downs and write offs, deferred income taxes, provision for contractual obligations and our ability to continue as a going concern. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

No report required.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. Disclosure and control procedures are also designed to ensure that such information is accumulated and communicated to management, including the chief executive officer and chief financial officer, to allow timely decisions regarding required disclosures.

We carried out an evaluation, under the supervision and with the participation of management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2022. In designing and evaluating the disclosure controls and procedures, management recognizes that there are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their desired control objectives. Additionally, in evaluating and implementing possible controls and procedures, management is required to apply its reasonable judgment. Based on the evaluation described above, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were not effective as of the end of the period covered by this report because we did not document our Sarbanes-Oxley Act Section 404 internal controls and procedures.

As funds become available to us, we expect to implement additional measures to improve disclosure controls and procedures such as implementing and documenting our internal controls procedures.

Changes in internal controls over financial reporting

There was no change in our internal controls over financial reporting that occurred during the period covered by this report, which has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Limitations on the Effectiveness of Controls

A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The Company's management, including its Principal Executive Officer and its Principal Financial Officer, do not expect that the Company's disclosure controls will prevent or detect all errors and all fraud. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with associated policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

We are not engaged in any litigation at the present time, and management is unaware of any claims or complaints that could result in future litigation. Management will seek to minimize disputes with its customers but recognizes the inevitability of legal action in today's business environment as an unfortunate price of conducting business.

ITEM 1A. RISK FACTORS.

Not required for smaller reporting companies.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

During the three months ended March 31, 2022, we issued 114,653 shares of our common stock to directors and a consultant as consideration for services. The securities were issued in private transactions in reliance upon an exemption from registration pursuant to Section 4(a)(2) of the Securities Act, as a transaction not involving any public offering.

During the three months ended March 31, 2022, we issued 2,125,000 shares of our common stock to existing holders of our Series B Preferred Stock upon conversion of such preferred stock in accordance with its terms. Upon the conversion, the Company also issued warrants to the converting preferred stockholders to purchase 2,125,000 shares of the Company's common stock. The shares and the warrants were issued in reliance on the exemption from registration provided by Section 4(a)(2) of the Securities Act and/or Section 3(a)(9) of the Securities Act.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.

31.1	Rule 13a-14(a)/15d-14(a) certification of Chief Executive Officer

SIGNATURES

In accordance with Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Dated: May 16, 2022

Nightfood Holdings, Inc.

By: /s/ Sean Folkson
Sean Folkson,
Chief Executive Officer
(Principal Executive, Financial and
Accounting Officer)

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Sean Folkson, certify that:

1. I have reviewed this Form 10-Q of Nightfood Holdings, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods present in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principals;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involved management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO 18 U.S.C. SECTION 1350
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the accompanying Quarterly Report on Form 10-Q of Nightfood Holdings, Inc. for the quarter ended March 31, 2022, I, Sean Folkson, Chairman of the Board and Chief Executive Officer of Nightfood Holdings, Inc., hereby certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, to the best of my knowledge and belief, that:

1. Such Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2022 fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in such Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2022, fairly presents, in all material respects, the financial condition and results of operations of Nightfood Holdings, Inc.
